R. Curtis Bunting

Special Skills

Mr. Bunting manages bulk liquid storage facility projects.

He has an extensive background in managing technical sales and marketing organizations, as well as product development teams and business operations.

Mr. Bunting has over 7 years of experience in the bulk liquid storage business in which he has designed and managed fueling systems projects, grass roots terminal site plans, loading/unloading racks, terminal upgrade projects and tank skids. This experience is valuable as he also completes compliance manuals for our terminal clients. His terminal background was developed by gaining his experience as a project engineer for Diamond Shamrock Corporation and Carter & Burgess Engineers, Inc. He transitioned to technical sales for over 19 years to lead corporate sales organizations for the Engineering Systems Division of Xerox Corporation and also at BSG Clearing Solutions in the telecommunications services industry. This diverse experience provides a professional, customer-first approach that makes him uniquely qualified to manage a variety of projects and assignments for any client.

Mr. Bunting focuses on the front end of many projects in site project management, field construction, sales and marketing.

Related Experience

Terminal Operations

Project Engineer

Grapevine, Texas

Oversaw projects, security and general operations of 286K barrel, 4-bay terminal.

Refinery Operations

Project Engineer

Sunray, Texas

Designed and oversaw construction and installation of natural gas compressor and meter skids for natural gas, refined and products.
